

Call for Papers
2011 IEEE International Conference on Fuzzy Systems
SS04:Soft Computing for Operations Research and Optimization

Aim and Scope

At present, researchers in operations research and mathematical programming for uncertain data mainly use stochastic programming, fuzzy programming, and soft computing techniques. They are often taken from textbooks or research papers, and so are already outperformed by efficient and analytical methods.

The aim of this proposed special session is to present quality researches in the theoretical and practical development of mathematical programming and operations research, especially using latest, more efficient and analytical soft computing techniques developed for solving practical problems under uncertainty.

Keyword (not limited to)

Operation research
Fuzzy programming
Uncertain programming
Soft computing techniques for optimization
Practical applications with soft computing

Important Dates

Paper submission January 15, 2011
Notification of acceptance March 31, 2011
Final paper submission April 30, 2011

Submission Guideline

The submission deadline is the same of the FUZZ-IEEE2011. As for the submission guideline, please see the following Instruction for Authors. In the submission webpage, please be sure to select “SS04:Soft Computing for Operations Research and Optimization”.
