

**2011 IEEE International Conference on Fuzzy Systems
Grand Hyatt Taipei, Taipei, Taiwan**

**Call for Papers: Special Session on Universal Contents
Creation/Distribution and Intelligent System**

Submission Deadline: January 15, 2011

In order to achieve universal contents creation/distribution in network community, it is needed to create an environment in which anyone can produce any content they wish and in which content can be accessed while ensuring reliability. This special session focuses on how to induce users to contents they need and how to control the reliability of network community from the view point of soft computing-based approaches. Topics of interest include, but are not limited to theory and application of:

- Fuzzy model-based agent simulation
- Recommendation systems
- Decision analysis and support
- Kansei, human-machine interface
- Knowledge discovery, agents, knowledge representation
- Fuzzy systems and internet applications

Papers are invited from prospective authors with interest on the related areas.
